IMPORTANT DATES

Abstracts	31 Mar 2004
Paper Submissions	30 Apr 2004
Early Registration	6 July 2004
Hotel Reservation	9 Aug 2004

CMBEC28 is the premier event for biomedical engineering professionals in Canada. It offers a national forum for information exchange among researchers and clinicians working in biomedical engineering. One of the main objectives of this conference is to improve communication among all healthcare workers through the presentation and discussion of new research. The **Canadian Medical and Biological Engineering Society** invites physicians, engineers, researchers, students, technicians and technologists to join us in Québec City and discover the dynamic trends that are shaping the future of biomedical technology.

Québec City is one of the country's most popular visitor destinations. Conference events including meetings, courses, exhibits, and technical sessions, as well as accommodations for the conference will be at the Delta Québec Hotel, which is located in the heart of *Old-Québec*. The conference will open with plenary sessions, followed by concurrent streams of scientific and technical papers that will be presented over a three-day period. Manufacturers of medical instrumentation and technology are invited to showcase the latest emerging innovations and equipment. Service providers and regulatory bodies will present the most recent developments in healthcare management, safety standards and regulations. Continuing Education courses geared towards the needs of biomedical technology professionals will be offered on a variety of topics.

CMBEC28 is the unique opportunity to gain insight into the latest advances in biomedical engineering. Don't miss it!
